

# Crazy for COFFEE

Not just a great pick-me-up in a latte, caffeine is also the magic ingredient to de-puff and soothe your skin!

The coffee seed oil, clay and vitamin A in **Jojoba Company Skin Refining & Brightening Face Mask \$49.95** work together to wake up a tired, dull complexion.

A blend of ground coffee and coconut in **ONNE Body Scrub \$27** boosts circulation and helps improve the appearance of stretch marks and cellulite. It's gluten free, vegan and all natural, too.

Research suggests coffee can help stimulate hair growth and increase shine, so pop **Brite Organix Coffee Masque For Stressed Hair \$14.99** on your locks once a week to revive stressed-out strands.

Use **Sukin Energising Body Scrub \$14.95** during your morning shower to help invigorate and stimulate your skin and senses.

The magical brown bean in **Obagi ELASTiderm Eye Serum \$104** helps to reduce puffiness around your eyes, restores elasticity and boosts collagen production.

## KEY INGREDIENT: CAFFEINE

**1 IT FIGHTS INFLAMMATION**  
Caffeine's natural anti-inflammatory properties soothe irritation, calm redness and help to improve your skin's texture.

**2 IT TIGHTENS**  
By constricting the small blood vessels in your skin, caffeine firms and smooths the surface, stimulates circulation and helps fight the signs of premature ageing by drawing fluid away from cells.

**3 IT HYDRATES**  
Coffee actually has the same pH as your skin, so it won't dry it out or damage its delicate surface.

The powerful mix of green coffee, ginseng and marine collagen in **Skinstitut Ultra Firming Eye & Neck Cream \$45** works to combat signs of ageing – from fine lines and dark circles to pigmentation and sun damage.

**Edible Beauty & Velvet Coffee Body Butter Contouring Cream \$55** is an all-rounder, stimulating fat reduction under the skin and encouraging cells to form collagen. While organic camellia and sunflower seed extract help to smooth and nourish.

Arabic seed, grape seed, coconut and sweet almond oil make for a super-hydrating concoction in **Frank Body Body Balm \$24.95**. Rub it on after exfoliating.
